

## APPLICATION SHEET

METAL

# COPPER PARTS ATTACHED TO COPPER PUNCHED STRIP

### ■ The task

Punched copper parts are to be attached to a delicate copper punched strip as part of a manufacturing process.

### ■ The solution

The task was solved using torsional welding technology.

### ■ The advantages

Torsional welding ensures that the delicate, thin-walled punched strip is not damaged and the weld is still adequately strong.

The application was carried out on a TSP750 using additional components for the special rigging.
