

APPLICATION SHEET

METAL

COPPER/ALUMINUM CONNECTION

■ The task

Aluminum and copper wires are to be welded together.

Dimensions: 3 x 10 mm²
1 x 6 mm²

■ The solution

The machine used is a TelsoSplice machine.

■ The advantages

The TelsoSplice machine fully automatically adapts to the different diameters and is therefore particularly suitable for welding these types of connections.

The application was carried out on a TelsoSplice machine using additional components for the special rigging.
