

APPLICATION SHEET

COMPACTING COPPER BRAID

METAL

■ The task

A copper braid is to be compacted securely and quickly at the ends using ultrasonic technology.

■ The solution

With PowerWheel technology it is possible to securely compact even large copper braids.

■ The advantages

A very high output of up to 10 kW can be applied to the copper braid within a very short time period so that the individual strands are securely joined together.

The application was carried out on a PowerWheel using appropriate components for the special rigging.
