

«A Job with Perspectives»

The Swiss Telsonic Group has been offering its industrial ultrasonic solutions through representation in Europe, America and Asia since 1966. Constant innovations help to ensure that, in many applications, Telsonic has established a lead over competitors that offers added value to customers. With over 250 highly qualified staff, the owner-managed company specialises in plastic and metal welding as well as ultrasonic cleaning and screening. TELSONIC UK was the first subsidiary established in 1977 and is based in Poole, Dorset. The range of ultrasonic welding equipment includes hand-held units, bench top systems & bespoke special purpose welding systems. In addition to this we have a range of equipment aimed at the OEM market for specialist machine builders.

We are looking for the following talents to join us

Service & Calibration Engineer m/f/d

Poole, Dorset

THE POSITION INVOLVES

- Repair/Service of ultrasonic equipment.
- Fault finding & diagnostics.
- Calibration of equipment at customers premises.
- To carry out inspection, service, repair & testing of ultrasonic equipment on customer sites & within our Poole workshop.
- Working on installations alongside others & independently.
- Complete necessary paperwork in line with the companies set procedures.
- Adhering to quality, health, safety & environment regulations.
- In order to succeed in this role it is expected that you will have good problem solving and practical thinking skills to ensure the safe and effective operation, maintenance and repair of all equipment.

ATTRIBUTES

- A minimum of 5 years mechanical, electrical and pneumatic engineering experience.
- Strong communication skills to work professionally with customers & colleagues.
- A positive attitude to new challenges would be expected together with self-motivation and the ability to take on additional responsibilities in the future.
- Travelling is involved therefore a full driving licence is required.
- The ideal candidate must not only be hard working, diligent and able to work independently but also be a flexible team player. Attention to detail is a must.

JOB PURPOSE

Repair, service and calibration of equipment either on customers premises or here at Poole. (Relevant training, help & guidance will be given).
The engineer will also be required to assist with site installations and training in some instances.

Clothing & safety shoes provided.
