

## **TELSONIC and Schleuniger sign Cooperation Agreement**

Bronschhofen, August 2013 –TELSONIC Group headquartered in Bronschhofen (Switzerland), one of the leading companies in the industrial ultrasonic applications market, and Schleuniger Group, headquartered in Thun (Switzerland), one of the leading suppliers in the wire processing industry, have signed a cooperation agreement.

The cooperation is aimed to strengthen both companies in their respective market positions and innovation power. TELSONIC (in the field of metal welding) and Schleuniger are well-known providers of high quality equipment used in the value chain “wire harnesses for the automotive industry” and serve the same customers. The product portfolios supplement each other. Neither of the two companies is in any way limited by this partnership.

This cooperation allows our customers to utilize an even better integration of the different technologies into their value chains, optimized interfaces among production equipment and manufacturing execution systems as well as from an improved market support.
