

CIBF2016: 12th China International Battery Fair

Shenzhen Convention & Exhibition Center, May 24-26, 2016

The 12th China International Battery Fair (CIBF2016) was launched in Shenzhen Convention & Exhibition Center on May 24, 2016. CIBF, held by China Industrial Association of Power Sources, is the first registered trademark for battery exhibition and conference in China and is the largest battery fair worldwide. CIBF2016 covered an area of 82,500m², featured 4,000 booths and attracted more than 1135 delegates and 40,000 visitors from more than 50 countries and regions.

Telsonic exhibited three main products at the fair, which were the state-of-the-art and patented Torsional welding technology TSP 750E; a new version of the proven Telso®Splice welding system for welding cable strands, the TS3 with 3.6kW power and the MPX metal welding system with 3.6 kW. Since the main theme was batteries, many visitors were interested in the metal welding system MPX.

By participating at CIBF, Telsonic showcased its expertise in battery applications, world-class quality products its professional team. Visitors were impressed. We had an opportunity not only of meeting existing key accounts, but also of building up connections with potential customers. The participation in CIBF 2016 was a great success for Telsonic.
